SUMMARY

Informatics graduate with frontend internship experience at Mantra. Build web interfaces, APIs, and database-backed applications with React, TypeScript, Express, and SQL.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS

Backend & data: Node.js, Express, REST APIs, MySQL, Supabase, PostgreSQL

Tools & integration: Git, Docker Compose, MQTT, Laravel API integration

EXPERIENCE

Front-End Intern | Mantra (Teman Transisi)

March 2025 - October 2025

- Implemented responsive web pages and admin dashboard interfaces using Tailwind CSS.
- Added frontend validation for create, read, update, and delete (CRUD) workflows.
- Collaborated with backend developers to integrate APIs in a Laravel application.

PROJECTS

Dashboard Profile UPNVJ | Fullstack web application

Individual implementation | React, TypeScript, Express, Supabase | [Source](#) | [Live demo](#)

- Built the frontend and backend for a profile-content dashboard with public pages and an authenticated admin interface.
- Implemented Express APIs and configured data access using Supabase Row Level Security (RLS).
- Used dynamic imports and memoized React context in the frontend implementation.

Smart Home IoT | Coursework project

Individual implementation | Express, MySQL, MQTT, Docker | [Source and simulator instructions](#)

- Built the web dashboard and backend services for sensor monitoring and light, fan, and smart-lock controls.
- Connected device telemetry and commands over MQTT, with state persisted in MySQL.
- Configured services with Docker Compose and a Node.js device simulator for demonstrations without physical hardware.

EDUCATION

Universitas Pembangunan Nasional Veteran Jakarta

Informatics graduate | 2022 - 2026 | GPA: 3.76 / 4.00
